PLANT AND SOIL

Contents Volume 281 Nos. 1–2 March 2006

*Commentary*
**Quantity of standing litter: A driving factor of root dynamics**
M.F. Cotrufo 1–3

**Increased litterfall changes fine root distribution in a moist tropical forest**
E.J. Sayer, E.V.J. Tanner and A.W. Cheesman 5–13

**Mycorrhizal hyphal turnover as a dominant process for carbon input into soil organic matter**
D.L. Godbold, M.R. Hoosbeek, M. Lukac, M.F. Cotrufo, I.A. Janssens, R. Ceulemans, A. Polle, E.J. Velthorst, G. Scarascia-Mugnozza, P. De Angelis, F. Miglietta and A. Peressotti 15–24

**Mapping QTLs for phosphorus-deficiency tolerance at wheat seedling stage**
J. Su, Y. Xiao, M. Li, Q. Liu, B. Li, Y. Tong, J. Jia and Z. Li 25–36

**Characterization of viticultural terroirs using a simple field model based on soil depth I. Validation of the water supply regime, phenology and vine vigour, in the Anjou vineyard (France)**
F. Bodin and R. Morlat 37–54

**Characterization of viticultural terroirs using a simple field model based on soil depth – II. Validation of the grape yield and berry quality in the Anjou vineyard (France)**
R. Morlat and F. Bodin 55–69

**Unusual fine root distributions of two deciduous tree species in southern France: What consequences for modelling of tree root dynamics?**
R. Mulia and C. Dupraz 71–85

**Using the selective ion exchange resin extraction and XANES methods to evaluate the effect of compost amendments on soil chromium(VI) phytotoxicity**
D.-Y. Lee, Y.-N. Shih, H.-C. Zheng, C.-P. Chen, K.-W. Juang, J.-F. Lee and L. Tsui 87–96

**The effects of crop rotation and nitrogen fertilization on soil chemical and microbial properties in a Guinea Savanna Alfisol of Nigeria**
M.K.A. Adeboye, E.N.O. Iwuafor and J.O. Agbenin 97–107

**Distribution of carboxylates and acid phosphatase and depletion of different phosphorus fractions in the rhizosphere of a cereal and three grain legumes**
M. Nuruzzaman, H. Lambers, M.D.A. Bolland and E.J. Veneklaas 109–120

**Effects of soil structure on pea (*Pisum sativum* L.) root development according to sowing date and cultivar**
A. Vocanson, J. Roger-Estrade, H. Boizard and M.-H. Jeuffroy 121–135

**Responses of papaya seedlings (*Carica papaya* L.) to water stress and re-hydration: growth, photosynthesis and mineral nutrient imbalance**
J. Mahouachi, A.R. Socorro and M. Talon 137–146

**Assessment of the efficiency of a metal phytoextraction process with biological indicators of soil health**
J. Hernández-Allica, J.M. Becerril, O. Zárate and C. Garbisu **147–158**

**Relative values of physiological parameters of P response of different genotypes can be measured in experiments with only two P treatments**
D.J. Greenwood, A.M. Stellacci, M.C. Meacham, A. Mead, M.R. Broadley and P.J. White **159–172**

**Effects of organic resource quality on soil profile N dynamics and maize yields on sandy soils in Zimbabwe**
F. Mtambanengwe and P. Mapfumo **173–191**

**Heterotrophic soil respiration in relation to environmental factors and microbial biomass in two wet tropical forests**
Y. Li, M. Xu and X. Zou **193–201**

**Growth suppression of canola through wheat stubble I. Separating physical and biochemical causes in the field**
S.E. Bruce, J.A. Kirkegaard, J. Pratley and G. Howe **203–218**

**Growth suppression of canola through wheat stubble II. Investigating impacts of hypocotyl elongation using simulated stubble**
S.E. Bruce, M.H. Ryan, S. Hely, J.A. Kirkegaard and J. Pratley **219–231**

**Soil solution nitrogen losses during clearing of lowland Amazon forest for pasture**
C. Neill, M.C. Piccolo, C.C. Cerri, P.A. Steudler and J.M. Melillo **233–245**

**Free atmospheric CO2 enrichment (FACE) increased labile and total carbon in the mineral soil of a short rotation Poplar plantation**
M.R. Hoosbeek, Y. Li and G.E. Scarascia-Mugnozza **247–254**

**Diversity and abundance of biological soil crust taxa in relation to fine and coarse-scale disturbances in a grassy eucalypt woodland in eastern Australia**
D.J. Eldridge, D. Freudenberger and T.B. Koen **255–268**

**Variation for root aerenchyma formation in flooded and non-flooded maize and teosinte seedlings**
Y. Mano, F. Omori, T. Takamizo, B. Kindiger, R. Mck. Bird and C.H. Loaisiga **269–279**

**Analysis of the expression pattern conferred by the *PsEnod12B* promoter from the early nodulin gene of *Pisum sativum* in transgenic actinorhizal trees of the *Casuarinaceae* family**
M.-O. Sy, L. Constans, M. Obertello, C. Geney, L. Laplaze, F. Auguy, V. Hocher, D. Bogusz and C. Franche **281–289**

**Can the biochemical features and histology of wheat residues explain their decomposition in soil?**
I. Bertrand, B. Chabbert, B. Kurek and S. Recous **291–307**

**Changes in soil microbial community associated with invasion of the exotic weed, *Mikania micrantha* H.B.K**
W.-H. Li, C. Zhang, H. Jiang, G. Xin and Z. Yang **309–324**

**Soil pH effects on uptake of Cd and Zn by *Thlaspi caerulescens***
A.S. Wang, J.S. Angle, R.L. Chaney, T.A. Delorme and R.D. Reeves **325–337**

**Long-term effects of pre-harvest burning and nitrogen and vinasse applications on yield of sugar cane and soil carbon and nitrogen stocks on a plantation in Pernambuco, N.E. Brazil**
A.S. de Resende, R.P. Xavier, O.C. de Oliveira, S. Urquiaga, B.J.R. Alves and R.M. Boddey **339–351**

**Contribution of different mechanisms to zinc efficiency in bread wheat during early vegetative stage**
Y. Genc, G.K. McDonald and R.D. Graham **353–367**

**Arbuscular mycorrhizal assemblages in native plant roots change in the presence of invasive exotic grasses**
C.V. Hawkes, J. Belnap, C. D'Antonio and M.K. Firestone **369–380**

**Instructions for authors** **381–384**
